LUCY DU JUNIOR SOFTWARE DEVELOPER

236.986.0616 durongchun@hotmail.com linkedin.com/in/durongchun Vancouver, BC github.com/durongchun

SUMMARY

- Focused junior software developer with strong foundation in full stack web development and experience programming on various platforms.
- Skilled in identifying problem areas, recognizing the impact on the business and users, and prioritizing the implementation of appropriate solutions.
- Earned reputation for consistently meeting project deadlines.

TECHNICAL SKILLS

Languages: C#, HTML, CSS, JavaScript, SQL

Development Frameworks: .NET Core (MVC), React, React Native, Angular, Node.js, Vue.js,

Databases: MS SQL Server, MySQL, MongoDB, DynamoDB, PostgreSQL

Cloud Services: Amazon Web Services, Mongo Atlas

EDUCATION AND TRAINING

BCIT (Certificate expected in May 2024)

Sept. 2024 - June 2025

Software Systems Development Program

Vancouver, BC

Bachelor - Degree of E-Commerce

June 2006

University of Electronic Science and Technology

ChengDu, China

TECHNICAL EXPERIENCE

Heymate May 2025

Team Lead — BCIT Industry Client Project

Vancouver, BC

Led a team of 3 students through the full SDLC—from requirement gathering to development, testing, and delivery.

- Developed the shopping cart backend, implementing 12 RESTful API endpoints across three controllers: RetailStoreController, RetailCartController, and RetailProductController.
- Designed and created two SQL Server tables: RetailCart and RetailCartItem, and implemented two stored procedures to handle core operations.
- Applied the DTO pattern to ensure clean separation between data models and API contracts.
- Collaborated with the frontend team during integration testing, resolving issues and verifying data flow across components.
- Managed version control using Bitbucket, handling branch strategy, code reviews, merges.

Movie Mar 2025

Key person — BCIT Internal Project

Vancouver, BC

Developed and deployed a full-stack movie web application using React.js for the frontend and Node.js/Express.js for the backend.

- Implemented dynamic movie filtering features, including:
 Popular, Top Rated, Now Playing, Upcoming.. and Filter by Year
- Enabled users to add movies to Favorites and Watch Later lists, with persistent data storage using DynamoDB.
- Deployed the app using AWS Elastic Beanstalk, integrated with EC2 instances, and managed media storage with S3.
- Styled the frontend with Sass, ensuring a clean, responsive, and engaging Ul.

PeakMotion Feb 2025

Key person - BCIT Internal Project

Vancouver, BC

Developed a full-featured e-commerce website for selling sportswear using ASP.NET Core MVC for the backend, and Bootstrap with custom CSS for a responsive and modern frontend design.

- Designed system flow through detailed use case diagrams and Entity Relationship Diagram (ERD).
- Implemented essential user features:
 Product display, checkout, place order, and payment pages.....
- Developed admin functionality to edit product details, including name, description, images, categories, colors, and sizes.
- Integrated SendGrid for automated email notifications (e.g., order confirmation, welcome emails).
- Implemented PayPal for secure online payment processing.

WORK EXPERIENCE

Foggix

Jan. 2023 — Jun. 2024

Full-Stack Developer (part time)

Richmond, BC

Reporting to Project Manager, accountable for code development for supporting the operation of over 200 elevators to ensure efficient and reliable vertical transportation.

LUCY DU JUNIOR SOFTWARE DEVELOPER

236.986.0616 durongchun@hotmail.com linkedin.com/in/durongchun Vancouver, BC github.com/durongchun

- Developed and maintained a full-stack elevator monitoring platform to enhance operational efficiency, using Vue.js for the front end, PostgreSQL for data storage, and Node.js for backend services, delivering a scalable, real-time monitoring solution.
- Built an automated fault detection and work order system, reducing maintenance response time.
- Integrated real-time alerting via Message Queuing (MQ) to automate issue resolution workflows.

Holinova

Software Engineer (full time)

Oct. 2022 - Dec. 2022

Richmond, BC

Reporting to Project Manager, worked on integrating Odoo CRM and Inventory with the Holinova system to ensure smooth data syncing and system reliability.

- Designed and implemented ETL (Extract, Transform, Load) processes for data integration.
- Developed an automation testing framework using Python to improve software reliability.
- Created and optimized test scripts for ERP ODOO to ensure system stability.

ADDITIONAL INFORMATION

Other Skills: Speak, Read and Write English and Chinese

Interests: Kick-boxing, PingPang, Tennis, and Running
